## To Our Valued Customers:

We wish to extend our gratitude to our existing relationships for the faithful partnership you have given us over the last 35 years. Our nursery is equally excited about potential partners that we will be meet and develop through the upcoming years. With your continued interest in our business, we are committed to bring to you the newest and best plants and service.

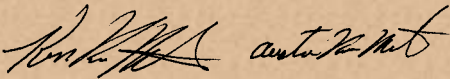

For more than 35 years our nursery has been a grower of quality grafted conifers and Japanese maples. We were blessed to have my father, Morris Van Meter, collect hundreds of different cultivars over the course of his career. This early effort afforded us a foundation that has allowed us to expand from a propagation nursery supplying other growers, to a production nursery serving all types of customers and plant request.

Our new facility in Jefferson, Oregon has brought much excitement to our nursery. The 400 acre production site is emerging with 350 acres of field production and 50 acres of can yard. This has given us depth in all our plant categories so we may better serve your needs. We welcome you to visit our farm and see the tremendous opportunities that await the future.

Our employees have made Van Meter & Son Nursery the success it is. I feel very fortunate to have been graced with the wonderful people that are part of our family. Without their continued dedication to excellence, our nursery would not be where we are today. As part of the renewed business climate at the nursery, our commitment to customer service and sales are without reproach. We have also added production and operational supervisors who have obtained unparallel quality standards that have never been reached at the nursery. I am thankful to each and every member of our team for without their passion for excellence; the nursery could not produce the best trees available in the industry. I'm very blessed.

"Growing our business together"

Sincerely,

Ron and Austin Van Meter

**SUBSTITUTIONS** - An adjustment of one grade up or down may be necessary to conform to our crop due to seasonal growing conditions beyond our control. If you cannot accept substitutions it must be indicated on the customer's signed acknowledgment.

**VOLUME REBATE PROGRAM** - We offer a sales dollar volume rebate program to our customers for all plant material. This program is valid for all catalog price items on orders paid within terms and will be based on the total dollar value of orders (excluding credits and returns) shipped throughout the year, from July 1, 2007 through June 30, 2008. The rebate will be issued on September 1, 2008 in the form of a credit memo to be applied towards future plant purchases. The total dollar amount (excluding credits and returns) and the related rebate percentages are listed below.

Total Purchases	Rebate Percentage
\$10,000 - \$19,999	5%
\$20,000 - \$49,999	10%
\$50,000 - \$99,999	15%
\$100,000 and greater	20%
